Summary of Key Comments on Coordination

IAASB

IESBA

IAASB and IESBA should adopt a systematic approach to their coordination efforts	Collaborate to address topics of mutual interest, such as the use of consistent terms and definitions
Aligning projects and relating timetables, and effective dates for related projects (if possible)	Alignment of timetables and effective dates
Including, in the Strategy and Work Plan, more specifics around the planned topics for coordination with the IESBA	Including questions that are relevant to both Boards to obtain views without using additional consultation papers
Aligning definitions as closely as possible	Staggering Board meetings and comment periods
Leveraging joint outreach activities	Having joint or shared outreach events
Opportunities for joint or complementary actions through standard-setting work	Broaden coordination efforts to other international standard setters

Since 2018, coordination between the two Boards has been operating under an established framework that sets out the general principles, criteria for coordination and other key considerations. Since then, the two Boards have continued to identify new means to ensure matters of mutual interests are addressed more efficiently such as the use of correspondent members in working groups and task forces and the inclusion of relevant questions in the other Board's exposure drafts and outreach events.
